

In all trees, indicate any movements with arrows and label the type of movement.

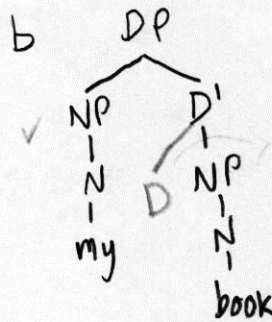

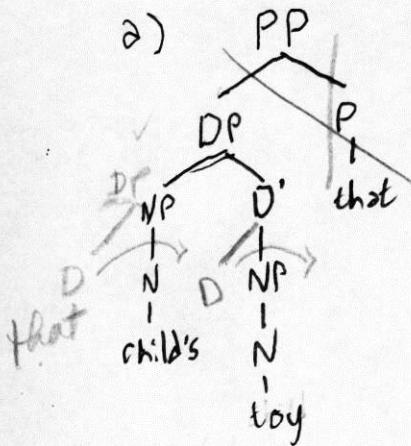

To simplify the trees, start subjects in Spec TP instead of Spec vP.

1. If you translated the exact phrases in (a) and (b) into a language such as Navajo where all the heads are on the right, what would the word order be?

(a) that child's toy Navajo word order: child's toy that

(b) my book Navajo word order: my book

Draw a tree for (a) and for (b) as they would be in Navajo.

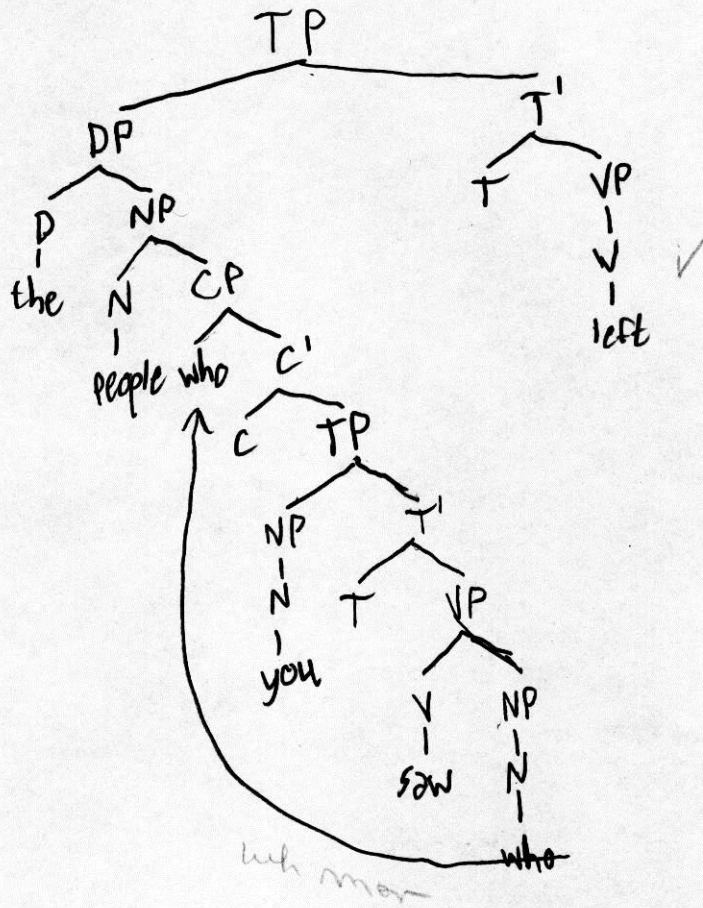

Every phrase
has a head

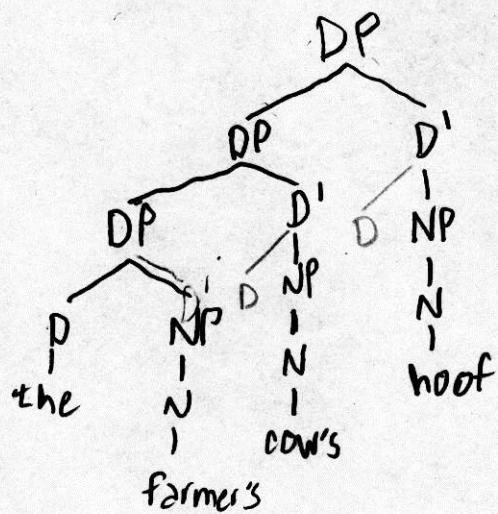

that is a D, like the

2. Draw a tree for the following English sentence:

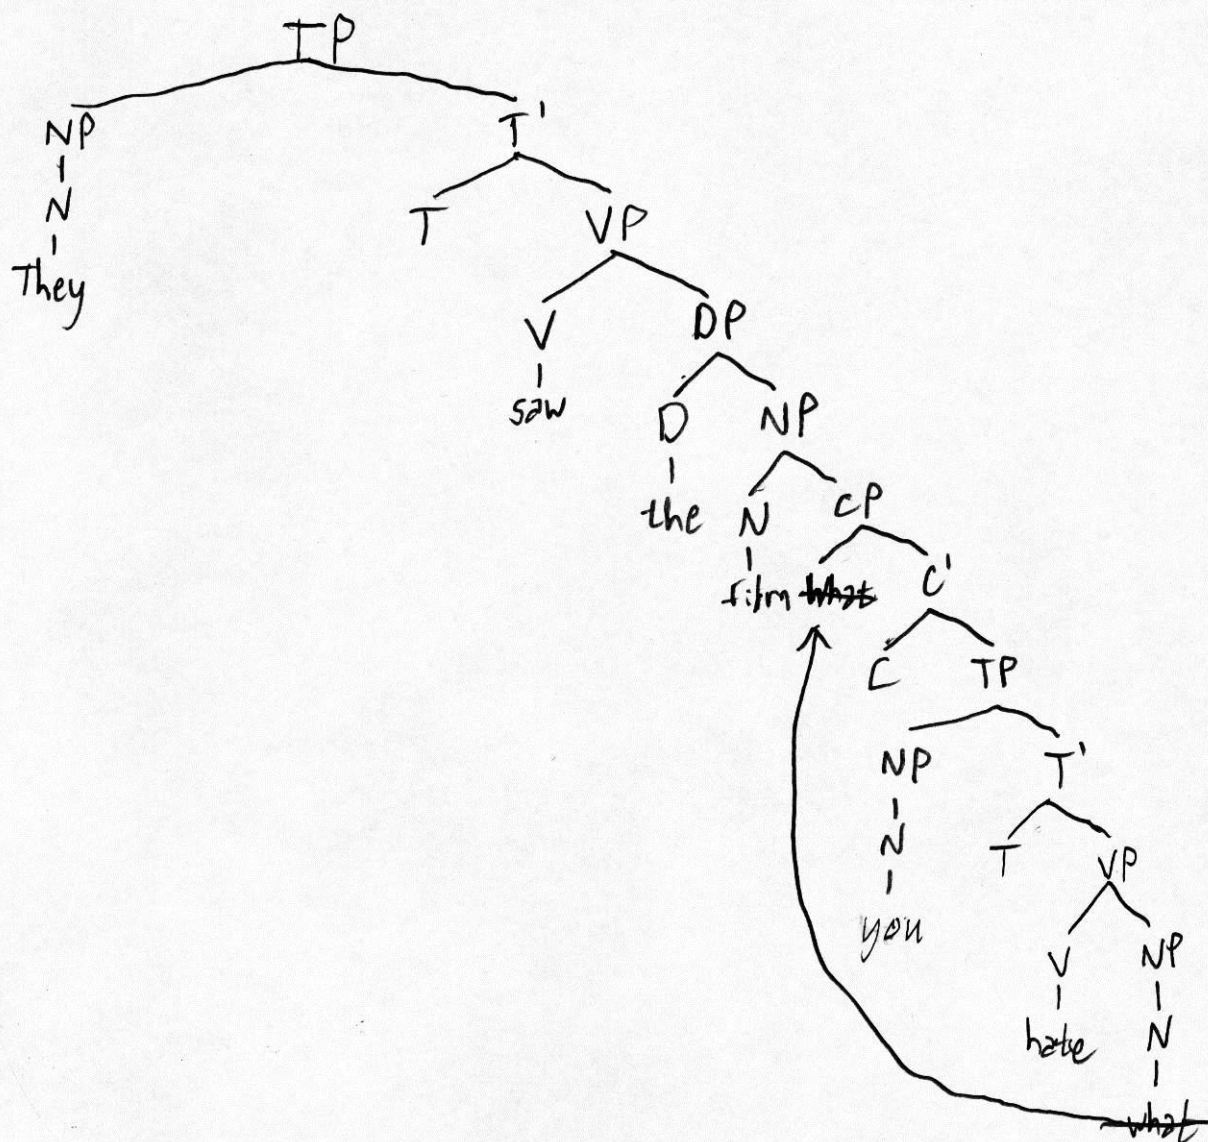

The people who you saw left.

3. Draw

4. Draw a triangle.

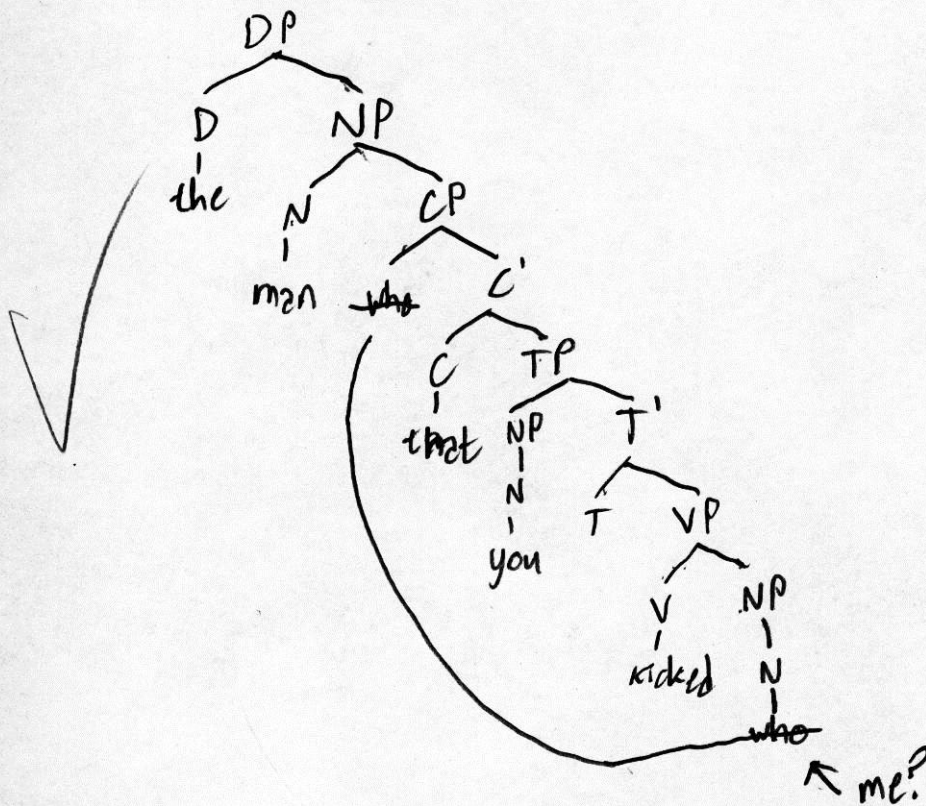

5. Explain exactly how/why the grammar predicts that the following sentence is ungrammatical:

* They met the man that you kicked me.

The ungrammatical part of this sentence is, in particular,
"the man that you kicked me"

~~Constructing the tree~~

The spot in the tree where this 'me'
would go is occupied by the elided "who"
